# Introduction to Data Analysis

Udacity

October 6, 2017

The above figure is a sample data set which describes the top skills for 2016 in different countries. Udacity asked to grab three different data points from the figure. And below is my report. I've met the project specification.

Insights from LinkedIn Top Skills for 2016

The top skills are those which are shown in the below figure. Each of the skill has a rank higher than the global rank in precisely six countries.

We can say that Germany is the only country which does not have any skill ranked more than the global. It can be inferred from the below figure.

The skills which have no demand in any country are SEO/SEM Marketing and Storage Systems & Management. No country has a more significant rank than the global rank. It is shown in the below figure.
